ØD [mm]	295	395	495	595	620
i [mm]	130	150	150	175	175

### DESCRIPTION

SR/NV are expansion boxes for NV diffusers. They stabilize the airflow and ensure uniform air supply to the diffuser. Expansion boxes connect diffusers with ventilation installation. They are made of zinc-coated sheet, joint by non-welded Click-Clock connection.

Expansion boxes can be connected to the ventilation installation through the side or top.

Boxes can be thermally and acoustically insulated from the inside by K-Flex rubber mat.

Upon customer's request we can make other types of expansion boxes accordingly to provided drawings.

## expansion boxes for diffusers NV

### INSTALLATION

Expansion boxes SR/ KWRD are designed for installation between the ceiling and underslung ceiling. Prepare an installation hole of a size of  $\varnothing D$  or  $A \times A$ . The box can be mounted onto the ceiling by appropriate hangers (bars, pins...) and installation slings. If installing in the underslung ceiling, mount the expansion box in so that edges stick out by approx. 12 mm from the ceiling plane.

Upon customer's request, boxes can be equipped with

1. factory slings
2. a crossbar that allows for installation of the front panel with one central screw
