

expansion boxes for diffusers OAN

Expansion boxes can be connected to the ventilation installation through the side or top.

Boxes can be thermally and acoustically insulated from the inside by K-Flex rubber mat.

Upon customer's request we can make other types of expansion boxes accordingly to provided drawings.

DESCRIPTION

SR/OAN are expansion boxes for OAN diffusers. They stabilize the airflow and ensure uniform air supply to the diffuser. Expansion boxes connect diffusers with ventilation installation. They are made of zinc-coated sheet, joint by non-welded Click-Clock connection.

expansion boxes for diffusers OAN

INSTALLATION

Expansion boxes SR/OAN are designed for installation in between the ceiling and the underslung ceiling or free hanging from the ceiling. If installing in between the ceiling and underslung ceiling, a hole should be left of a size of $\varnothing M$ for the chosen diffuser. The box can be mounted on the ceiling by appropriate hangers (bars, pins...) and installation slings.

Upon customer's request, boxes can be equipped with factory slings.
